“THE DIGITAL YOU”

We've gone digital! What do you need to know?

- Your “CLOUD” is called Google Drive
- Since you are storing all your papers, assignments, and projects to Google Drive, you are always on the web
- This means you are creating a “DIGITAL FOOTPRINT”

Time for a quick question...

What is a “Digital Footprint”?

What is a Digital Footprint?

“A digital footprint is a trail of data you create while using the Internet. It includes the websites you visit, emails you send, and information you submit to online services”.

Don't worry...

- You and your papers, assignments, and projects are protected

in a bubble called

@central301.net, and

these footprints can only

be seen in that bubble!

But, be careful...

- Be aware that any place on the web that asks for your information can track you.
- Be aware that any place on the web that you give your information to can also track you.

Time for a quick question...

What places do you go to, and apps do you use, that might leave a digital footprint?

Common places we leave our footprints

- Amazon
- Twitter
- Facebook
- SnapChat
- Instagram
- YouTube
- Tumblr
- Flickr
- Vine
- Pinterest
- Vimeo
- And thousands more

Digital Footprints

- Just like real footprints in the sand, your Digital Footprints leave a path that others can follow!

Footprints back to you...

- Have you ever searched online for something you wanted to purchase?
- Did you ever notice how when you do other searches on the internet you will get advertisements for the item you were shopping for?
- Someone has followed your footprints.

-
- Remember, whatever you post online is always there!!!
 - Even if you delete something, someone else may have already taken what was posted and forwarded it to other places you don't even know exist .

Being a good “Digital Citizen”

- Now that you know about being careful with your “footprints”, you are on your way to being a good “Digital Citizen”.
- What else can make you a good digital citizen?

Watch this video to learn about your role in being a good digital citizen!

Being a good “Digital Citizen”

1. Don't copy or plagiarize others' work.
2. Cite sources for anything you are using that isn't your own original work.
3. Don't share others' information or work without their permission.
4. Don't pretend you are someone else.
5. Don't say something online that you wouldn't say to someone in person.

Don't be a Cyberbully

What is cyberbullying, exactly?

"Cyberbullying" is when a child, preteen or teen is tormented, threatened, harassed, humiliated, embarrassed or otherwise targeted by another child, preteen or teen using the Internet, interactive and digital technologies or mobile phones. It has to have a minor on both sides, or at least have been instigated by a minor against another minor.

Quick question time...

What are some examples
of Cyberbullying?

What do I do if Cyberbullying occurs?

- Tell the bully to stop using clear and simple language. Ex. “Stop! I don’t deserve to be treated this way.”
- If the bullying continues after you have told the person to stop, **DO NOT RESPOND OR REACT ONLINE!** (The bully wants you to react... don’t give him/her that power.)
- Block the individual who is doing the bullying.
- If the incident occurs at school or a school sponsored event, and the bully persists after you have set boundaries, report the incident to an adult.

Chromebook Citizenship at PKMS

1. Use your Chromebook and other devices for educational purposes and when instructed to by a teacher or staff member.
2. Pack up your Chromebook after every class and always transport it in your bag. Treat your devices with respect!
3. Treat other students with respect and dignity while online. Your school emails are for educational use. Please utilize them for educational purposes!
4. Avoid visiting websites that have been blocked by District 301. Do not play or download games during classes.
5. Taking pictures or recording individuals without permission is a violation of school policy.

Your Chromebook is for Educational Purposes!

- Your device should not be used for reasons not related to education!
- Be careful when sending emails! Emails that have messages related to violence, bullying, self harm, or are sexually explicit, are forwarded to your principal and assistant principal.
 - Careful...Senders of emails involving the above messages may be issued consequences, and parents may be informed.
- A good rule of thumb is to send emails and correspondence that you would be comfortable sharing with your parents. Visit websites that you would be comfortable letting your parents know you have been visiting.

Remember...

-
- Be careful of your digital footprints.
 - Keep your information private.
 - Avoid strangers, don't friend everyone that you do not know.
 - Be mindful of what you say and post on your Chromebook and personal device.
 - Do your own work and cite your sources.
 - Stop cyberbullying!

AND...

T.H.I.N.K. before you post!

T= Is it TRUE?

H= Is it HELPFUL?

I= Is it INSPIRING?

N= Is it NECESSARY?

K= Is it KIND?
